NCFE only offer Level 1 certificates in these units. They do however, offer a Level 2 certificate in relationships, sex and health education.

YEAR 9 and 10 – Due to the GLH, this is a 2 year programme with each unit being achievable once completed. Each unit holds its own qualification and there is no combined qualification for achieving all of these units. Therefore, the pupils are able to achieve stand-alone unit qualifications at their own pace.

YEAR 11, have previously studied some or all of these areas and will have the evidence to support this. This evidence can be used to enter the students for these qualifications (if allowed) by submitting the already completed work which was pitched at level 2 so will fulfil the level 1 criteria.

Focus can then be on working towards the Level 2 certificate in relationships, sex and health education.

Years 12 and 13 will solely focus on the Level 2 certificate in relationships, sex and health education (due to the GLH)

Moving forwards, the students who complete the Level 2 certificate in relationships, sex and health education, will be able to complete the Level 1 units that they haven't completed.

The PSHE programme can be rolled over throughout the years to enable the students to complete as many of the units throughout the 3-4 years that they are studying PSHE.

Extra-curricular activities: We provide a variety of extra-curricular/enrichment activities for our students that enhance their learning experience. The activities range from educational trips and visits – a list of the extra-curricular/enrichment activities available for each year group is available below. Extra-curricular/enrichment activities are designed to enhance students’ learning experience, form personal connections between students and their peers, and teach skills essential for life after school.

IMPACT

Our curriculum has been designed for all our learners, providing equal opportunities for all. Through a varied evaluation including termly assessments, interventions and enrichment activities, our curriculum is designed to benefit our young learners in the following ways:

- Learning how to lead safe, healthy and fulfilling lives
- Understanding that failure is part of the road to success and there are further opportunities in life
- Being rewarded for continuous academic successes
- Being supported with their next stages in education or training and feeling prepared and confident for life after school
- Becoming responsible individuals who contribute positively to community and the environment in which they live
- Achieving to the best of their ability and ensuring they leave with a minimum of 5 qualifications including literacy and numeracy plus 3 vocational subjects
- Acquiring a wealth of knowledge and experience through enrichments activities, careers and apprenticeships
- Learning how to cooperate with their peers and respect one another inside and outside the classroom and becoming valued citizens to their community.
